JPMorgan Chase & Co.

Hiring Manager — Transactions Specialist II

Monroe, LA

Dear Hiring Manager,

I am writing to express my strong interest in the Transactions Specialist II position at JPMorgan Chase in Monroe, Louisiana. With a Bachelor of Accountancy from the University of Mississippi and direct experience in high-volume transaction processing, document handling, cash reconciliation, and regulatory compliance, I am confident I can contribute to your operations team from day one.

In my current role at Bayou DeSiard Country Club, I manage daily operations and logistics that require the same precision and structured execution this role demands — processing transactions accurately, maintaining production standards, and coordinating across departments to keep operations running smoothly. Previously, as an Accountant at Little and Associates, LLC, I managed documentation workflows where zero-error precision was non-negotiable: reconciliations, workpapers, and client submissions where a single discrepancy could disqualify an entire project file. That experience built the exact discipline required for processing and clearing transactions with the accuracy JPMorgan Chase expects.

What draws me to this opportunity specifically is Chase's 30-year investment in North Louisiana — with nearly 1,000 employees at the Monroe campus and the recent opening of the Ruston Operations Center, it's clear the firm is committed to growing operations here. I want to be part of that growth. I am also excited by JPMorgan Chase's push toward AI and automation in transaction processing. I am eager to develop proficiency with these technologies and contribute to innovation efforts that optimize how work gets done.

I bring strong critical thinking and problem-solving skills, a track record of handling customer inquiries with a positive-experience mindset, and the ability to escalate non-routine issues by applying common sense and experience from similar situations. I am comfortable sitting for extended periods, maintaining focus on detail-intensive work, and operating in a structured, supervised environment.

I would welcome the opportunity to discuss how my background in transaction processing, compliance, and operations aligns with what you need on your team. Thank you for your consideration.

Sincerely,

Chase Kinslow
