

CHASE KINSLOW

Compliance & Transaction Processing Professional

PROFESSIONAL SUMMARY

CPA-licensed transaction processing and compliance professional with a Juris Doctor and Bachelor of Accountancy. Three years processing, clearing, and servicing document transactions involving moderately complex tasks — including regulatory submissions, financial reconciliations, and audit fieldwork where a single error disqualified an entire file. Maintains the highest standards of production and accuracy across high-volume transaction environments. Experienced handling customer inquiries, escalating non-routine issues to senior team members, and applying knowledge of industry regulations to ensure compliance in all transaction activities. Developing proficiency in AI and automation tools to optimize processes.

KEY ACHIEVEMENTS & SKILLS

Document Transactions, Compliance & Accuracy

- Processed and cleared document transactions involving moderately complex regulatory submissions, adhering to established routines and procedures across LIHTC, HUD, and GAAP frameworks while maintaining zero-error production and accuracy standards
- Built parallel reconciliation models to extract, input, and track comprehensive financial data sets — reconciling cumulative construction draws and recommending variance-correcting adjustments to ensure total data integrity across client portfolios
- Maintained up-to-date knowledge of market products and industry regulations (DSCR, FMR tiers, set-aside requirements), applying this knowledge to ensure compliance in all transaction and submission activities

Transaction Processing & Production Standards

- Process and clear high-volume transactions daily, adhering to established routines and standard operating procedures while ensuring accuracy and timeliness across a fast-paced retail operation
- Reduced cash-handling discrepancies by 15% through disciplined daily reconciliation of register transactions, applying the same servicing, researching, and settling discipline the role requires
- Maintained inventory control systems by extracting data, inputting into digital tracking systems, and ensuring accurate record-keeping — reducing stockouts by 10% across all product categories

Customer Inquiries, Escalation & Process Optimization

- Handled customer inquiries and requests across departments, providing a positive customer experience at all touchpoints while resolving service issues and improving resolution time by 10%
- Escalated non-routine issues to senior team members, applying common sense and experience of similar situations to identify potential solutions — reducing service disruptions by 20% through proactive reporting
- Contributed to process optimization by developing automated Excel tracking models and digital inventory systems that streamlined daily operations and reduced manual data entry errors
